

Sneha S

Frontend Engineer | React.js | 3 Years Experience

+91-9844796044 | snehasadananda17@gmail.com | Mysuru, India | linkedin.com/in/sneha-s-55b557211

PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of experience building scalable, responsive web applications using React.js and JavaScript. Proven ability to deliver reusable component libraries that reduce development time, integrate LLM-powered features, and optimise UI performance. Experienced working across cross-functional teams on client-facing products in education and e-commerce domains.

TECHNICAL SKILLS

Frontend: React.js, React Native, JavaScript (ES6+), HTML5, CSS3

Backend / DB: Node.js, PHP, Java, SQL, PHPMyAdmin

CMS / Platforms: WordPress, Shopify, cPanel, Web Hosting

Tools: REST API Integration, Git, Performance Optimisation, Lighthouse

WORK EXPERIENCE

Software Engineer | *VikimediaTec Pvt Ltd*

Dec 2023 – Present

- Engineered 8+ responsive web applications across 6–10 client projects using React.js, JavaScript, HTML5, and CSS3, delivering production-ready interfaces on schedule.
- Built a library of 15+ reusable React components adopted across projects, reducing frontend development time by ~25%.
- Collaborated with designers and backend teams to translate UI/UX specs into pixel-accurate, functional interfaces across 6+ client projects.
- Integrated RESTful APIs into frontend applications, enabling seamless real-time data flow across client-facing dashboards and portals.
- Optimised UI performance through code splitting, lazy loading, and asset compression, improving average Lighthouse score from the low 50s to the low 70s.
- Built and maintained CMS-driven solutions using WordPress integrated with React frontends, supporting non-technical clients to manage content independently.

Junior Technical Support (Web Advisor) | *GlowTouch*

Apr 2023 – Dec 2023

- Resolved 100–300 web hosting and email support tickets monthly, maintaining a ~95% first-contact resolution rate.
- Diagnosed and fixed website and email configuration issues using Linux command-line tools, reducing average time-to-resolution per ticket.
- Delivered tailored product recommendations and onboarding guidance, contributing to high customer retention through consistent service quality.

PROJECTS

STEMIFY — *AI-Powered Education Platform*

- Led frontend development as 1 of 3 engineers, building all student-facing UI screens in React.js for an LLM-powered learning platform.
- Implemented dynamic, API-driven UI components that updated content in real time based on student interactions and backend model responses.
- Integrated LLM backend services into the frontend layer, enabling AI-generated content to render seamlessly within the learning interface.
- Improved UI accessibility and load performance, contributing to a smoother, more consistent experience for student users.

Shopify & CMS-Based Websites

- Designed and customised 2 Shopify storefronts with bespoke theme modifications, third-party app integrations, and mobile-first responsive layouts.

- Improved page performance and UX across storefronts by optimising image assets, refining CSS, and integrating REST APIs for product and inventory data.

EDUCATION

B.Tech in Computer Science

2022

Maharaja Institute of Technology, Mysore
