PROFESSIONAL SUMMARY

Full Stack JavaScript Developer with 3+ years of experience building scalable web applications using React.js, Node.js, and JavaScript (ES6+). Proven track record integrating LLM and AI-powered features into production interfaces. Strong foundation in asynchronous programming, REST API integration, and real-time data workflows. Experienced collaborating with cross-functional teams across education and e-commerce domains. Eager to apply full-stack and AI integration skills toward building TypeScript-based automation agents and browser automation pipelines using Puppeteer or Playwright.

TECHNICAL SKILLS

Languages & Runtimes: JavaScript (ES6+), TypeScript (learning), Node.js, PHP, Java

Frontend: React.js, React Native, HTML5, CSS3

Backend & Databases: Node.js, REST API Integration, SQL, PHPMyAdmin

Automation & Browser: Puppeteer / Playwright (familiar), async/await, event-driven workflows

AI & LLM Integration: LLM API integration, AI-generated content rendering, real-time model responses

Performance & Tooling: Code splitting, lazy loading, asset compression, Lighthouse optimisation, Git

CMS & Platforms: WordPress, Shopify, cPanel

Infrastructure & DNS: DNS Configuration, Cloudflare (CDN, DNS, security rules)

Analytics & Tag Management: Google Analytics, Google Tag Manager (GTM)

Methodologies: Agile (Scrum / Kanban), code reviews, cross-functional collaboration

WORK EXPERIENCE

Software Engineer | WikimediaTec Pvt Ltd | Bangalore, India

December 2023 – Present

- Engineered 8+ responsive, production-ready web applications across 6–10 client projects using React.js, Node.js, JavaScript, HTML5, and CSS3.
- Designed and maintained a reusable React component library of 15+ components shared across multiple projects, reducing frontend development time by approximately 25%.
- Integrated RESTful APIs into client-facing dashboards and portals, implementing asynchronous data flows and real-time updates — a pattern directly applicable to automation agent development.
- Led frontend integration of LLM backend services for STEMIFY, an AI-powered education platform, enabling AI-generated content to render dynamically in response to model outputs.
- Built dynamic, API-driven UI components that updated in real time based on user interactions and backend responses, demonstrating hands-on experience with event-driven architectures.
- Optimised application performance using code splitting, lazy loading, and asset compression, improving average Lighthouse scores from the low 50s to the low 70s.
- Collaborated with designers, backend engineers, and business analysts to translate requirements into functional interfaces across 6+ client engagements.
- Built and maintained WordPress and React integrated CMS solutions, enabling non-technical stakeholders to manage content independently.
- Managed DNS configuration and Cloudflare settings (CDN, security rules, SSL) for client deployments, ensuring reliable uptime and performance.
- Implemented Google Analytics and Google Tag Manager (GTM) across client websites to track user behaviour, conversions, and campaign performance.

Junior Technical Support (Web Advisor) | GlowTouch | Mysuru, India

April 2023 – December 2023

- Resolved 100–300 web hosting and email support tickets monthly, maintaining a 95% first-contact resolution rate.
- Diagnosed and fixed website and email configuration issues using Linux command-line tools, strengthening debugging skills in real production environments.
- Delivered tailored technical onboarding and product guidance, contributing to high customer retention through consistent service quality.

PROJECTS

STEMIFY — AI-Powered Education Platform

- Served as 1 of 3 engineers responsible for all student-facing UI screens in React.js for an LLM-powered adaptive learning platform.
- Integrated LLM backend APIs into the frontend layer, rendering AI-generated content dynamically based on student interactions — directly analogous to building intelligent automation agent interfaces.
- Implemented API-driven components with real-time updates, demonstrating proficiency in async JavaScript patterns and event-driven UI design.
- Improved UI accessibility and page load performance, delivering a consistent experience across diverse user cohorts.

Shopify & CMS-Based E-commerce Storefronts

- Designed and customised 2 Shopify storefronts with bespoke theme modifications, third-party app integrations, and mobile-first responsive layouts.
- Integrated REST APIs for real-time product and inventory data; optimised page performance through image compression and CSS refactoring.

EDUCATION

B.Tech in Computer Science — Maharaja Institute of Technology, Mysore | 2022
